

a characterization program to transfer images to the user's display based on the selection information received from the user.

<sup>75</sup> 68. The system of claim <sup>69</sup> 62, wherein the characterization program further comprises:

a characterization program to create a user's display characterization file comprising the color display characteristics of the user's display.

<sup>76</sup> 69. The system of claim <sup>75</sup> 68, wherein the characterization program further comprises:

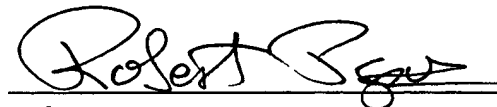

an algorithm to analyze the selection information received from the user to determine the color display characteristics of the user's display.

#### REMARKS

This is a continuation application of serial no. 09/439,482 filed on November 12, 1999. No new matter has been introduced by this preliminary amendment. All claims presented herein are directed to the originally disclosed invention, and early consideration and allowance are earnestly solicited.

Respectfully Submitted,

Dated: June 23, 2000
